Has the use existed since November 28, 1975? ☐ Yes ☐ No ☒ Unknown
Comments:

Comments: The UAA was conducted in July 2005 and no WBCR was observed. The stream met the maximum depth criterion at 1 out of 7 sites and the average depth criterion at 1 out of 7 sites. The stream was close to the criterion at 1 site. Because there is depth farther down in the stream, the committee recommends removing the WBCR designation from site 4 upstream and retaining the WBCR from site 4 downstream .

Committee Recommendation: ☐ Retain Use ☒ Modify Use ☐ Remove Use ☐ Inconclusive
